

Catfish's whiskers, they are twirling and dancing. Its beautiful pink babies wriggle their tiny whiskers. Their mom's eyes are colored like blue-red-gold. Its dragon-like scales tint with color. When Catfish, all start small, delicate and pink colored. But youth does not last forever. When Catfish glimmers and shines like a galaxy full of stars. Its pink, and purple tail waves peacefully as it swims. Its catfish children pass by their sisters and brothers. Together adult catfish and baby catfish look like a rainbow family.
