

and it is a wonder

that ice and water from tubes in the ice

in March

split, subside

along in the gutter

like pouring from the sky

that out your tongue

and water never is water

in April

Woke up at five

Get dressed

Grab the keys

Oh your hair is thick

Is it worth about three

in May

Power through the water

Be a fly on

Pop out of the water

Go on

and watch your suit tear out

in June

Schedule out

Turn on the speaker

Get up the slip in slide

Watch your brother go down it

and enjoy the weather

in July

Don't take showers

Change quickly as you will be later

in October

Race with your friends to the next house

Body down water as fall rush by you

Wait for apples

and have a fun Halloween

in November

The hot underwear comes

School gets canceled

Fun!

Meet up with your friends

Have a chilling time

Go home to see if that situation waiting for you

in December

Christmas is the at

Watch out of the window

As snow falls softly to the ground

Covering the earth with a soft blanket

lights sparkle outside

Now, I see more water

That all the things that listed here

Should not be possible

There would be more about water

And everyone would have wished that we had used

water

Water levels would rise

And fill up the coast

Down the land masses
