

and very colorful. They are very noisy birds. They  
own. In the blue jays, and crows. Their biggest  
problem is a cat though. Female cardinals  
have a very different behavior unlike the  
males. Only during the Spring and Summer  
male cardinals are aggressive and they  
defend against other males and predators.  
Female cardinals are very quiet unlike  
male cardinals. Male cardinals are large  
and can grow up to 7 to 9 inches.  
while a female grows up to 5 to 6 inches  
and most of the females don't  
grow out to 3 inches. Cardinals are such  
a beautiful type of bird.
